

AG&P Named 2019 Best Gas Logistics Solutions Provider

Singapore, 19 December 2019 – Atlantic, Gulf & Pacific Company (AG&P), the global downstream gas and LNG logistics company, has been named the Best Gas Logistics Solutions Provider for 2019 in the annual Oil and Gas Awards. AG&P was recognized for enabling access to clean energy in nascent markets by establishing vital links to natural gas as a principal fuel source.

Now on its fourth year, the Oil and Gas Awards recognize global companies and individuals for leadership and innovation in the oil and gas sector, with an emphasis on developing technologies and solutions that lower emissions and increase clean energy adoption. The 2019 award for its gas logistics platform follows AG&P's success in 2018, when the company was named Best Global Energy Infrastructure Company.

"We are honored to receive this award which recognizes the difference AG&P is making in the downstream gas sector. Our goal is to improve millions of lives by providing clean, secure and affordable natural gas to customers in new and growing markets around the world. Our gas logistics solutions make this possible by lowering costs, making installation easy and accelerating construction schedules, offering a compelling alternative to traditional, high-cost onshore LNG infrastructure." said Karthik Sathyamoorthy, President of LNG Terminals and Logistics at AG&P.

AG&P invests in and develops LNG assets to bring LNG to downstream customers. Together with its group companies, Gas Entec and Kanfer Shipping, the company provides an integrated gas logistics platform covering the entire gas value chain, from sourcing supply to delivery to end-users.

About AG&P:

AG&P is a leading provider of LNG and gas logistics, distribution and infrastructure solutions. We invest in and develop LNG assets to bring LNG to downstream customers. Our services cover the value chain of development, engineering, procurement, project management and construction for onshore and offshore gas infrastructure, linking suppliers to downstream customers. Together with its group companies, Gas Entec and Kanfer Shipping, AG&P is making natural gas and LNG available to industrial, commercial, vehicular and domestic customers.

With a strong heritage in world-standard LNG engineering and infrastructure construction for the oil and gas, power and petrochemicals industries, we bring deep technical experience, a world-leading safety record and unrivalled end-to-end execution capabilities to our global projects.
